About Learning Curve

Learning Curve is a skills development organization founded with the core purpose of providing structured and proactive skills training and capability building initiatives to educational institutions and corporate organizations.

Learning Curve believes that

- Skills development is critical to an individual and an organization's overall wellbeing in order to utilize opportunities to grow in a fiercely competitive world
- Inculcating life and employability skills in a structured and proactive manner is as important as the knowledge garnered from conventional education systems
- Capability building is an essential element of employee engagement as well as sustainable growth in learning and listening organizations
- Everyone should have access to affordable training to improve his or her skills

Learning Curve is passionate about:

- Creating and delivering effective training
- Blending expertise with an openness to learn
- Leveraging cross-functional training skills and experience
- Developing innovative training methodologies
- Ensuring that your training investment translates into measurable impact

Our training ethos and style

- Focused interventions to encourage learning by doing – far more sustainable than a classroom lecture
- Drawing from experiences and using creative thinking tools to stimulate the mind and ensure retention of concepts
- Simple design, powerful delivery for maximum impact
- Customised and delivered in various formats
 - Short workshops
 - Periodic workshops
 - Retreats
 - Group coaching

What do we bring to the table?

READY FOR THE WORLD

Life skills training programs for schools

- **Free your mind!** : Creativity skills at work

PROJECT MANAGEMENT THAT WORKS

Our Project management capability building initiative

- For small & medium enterprises who wish to establish and/or augment their project management skills
- Focus on project management as a competency, rather than just a department of project managers
- Basic and advanced workshops on PM knowledge areas to establish these capabilities
- Choice of organizational consulting models that includes skills development and implementation of capabilities
